

PROFILE

Junior Software Developer with a background in Natural Sciences and Dentistry. Capable problem solver with the creative insight to build user friendly designs and products. Bootcamp-level experience in Javascript, React, Express and Test Driven Development. Able to work independently and as part of a team with experience in Agile/Scrum methodologies. Currently looking for an entry-level position that promotes personal and professional growth, leverages my creative perspective, and allows me to make meaningful contributions to a wider cause.
